Una propuesta orientada a la formulación de las políticas públicas

PROSPECTIVE AND TECHNOLOGICAL SURVEILLANCE. A proposal oriented to public policies formulation

ABSTRACT

The systemic relationship between strategic planning, prospective and scientific-technological surveillance, involves visualizing an integral process where future scenarios can be formulated after managing the information that emerges day by day in scientific-technical matters.

It is key to be able to alert in a timely manner to support better decisions and formulate public policies in line with national and global changes. Policies that in a sovereign way, can guide research, the social appropriation of knowledge, its adequate dissemination and application, to guarantee solutions that respond to the needs of our society.

Thus, the use of technological scientific surveillance as an information management tool provides decision makers with the essential elements for the articulation of politics and the strengthening of the technological scientific ecosystem as a pillar of the nation's development.

Keywords: Strategic planning, public policies, prospective, Scientific and technological surveillance
